

Gundalow Company Mini-Unit

Focus Question: How does Energy Flow Through a Marine Ecosystem?

Objective: Identify the organisms in a NH marine food web

Materials: Paper, colored pencils

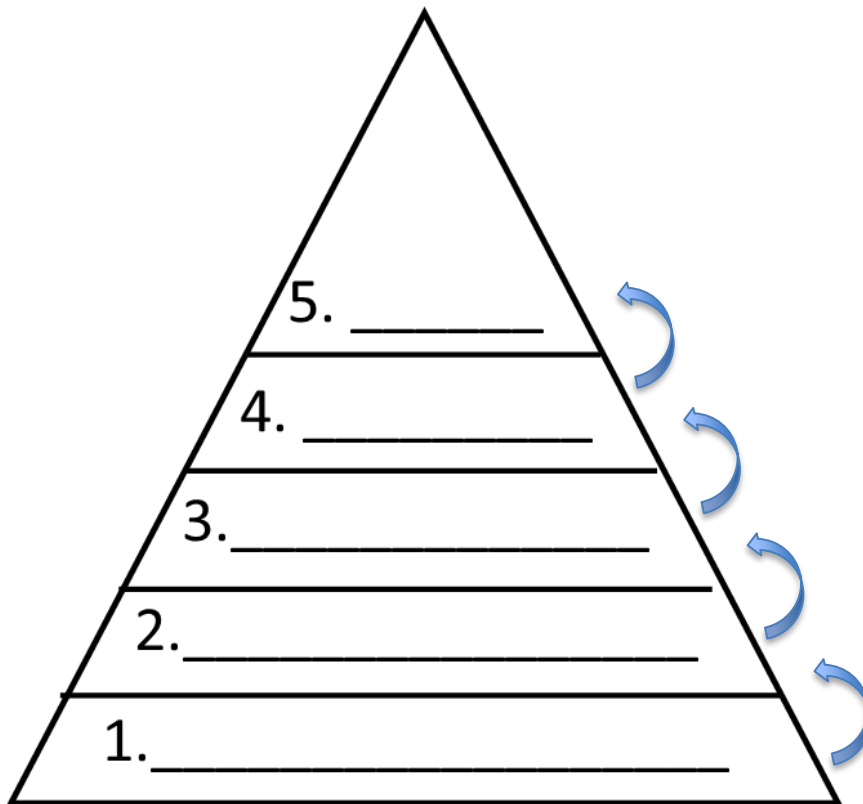

Procedure: Print out this sheet and follow the questions:

Complete A: LABEL the Ecological ROLES

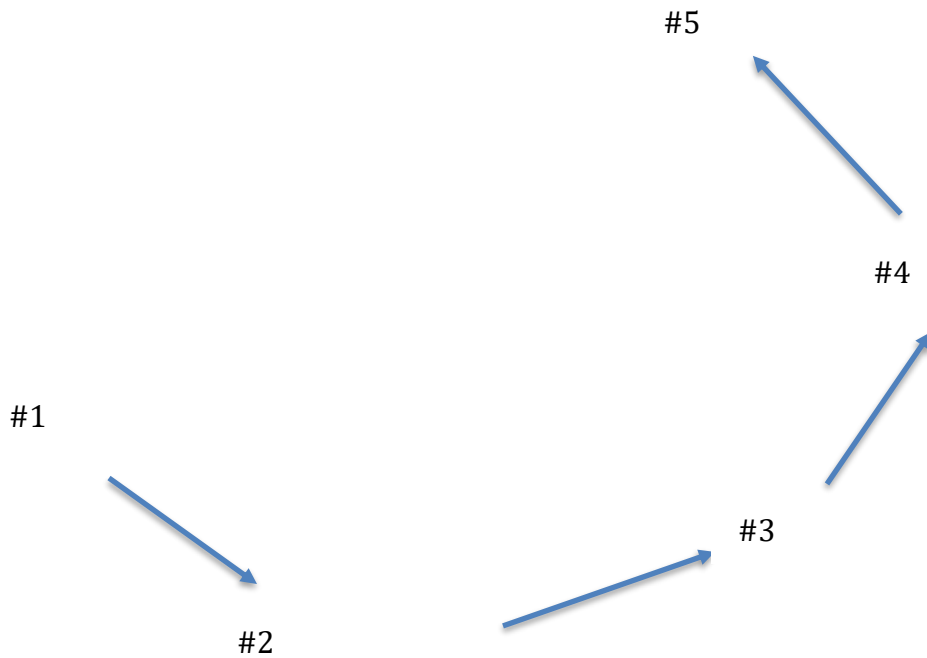

Complete B: DRAW an example (use the hints)

A: LABELS

Example

B: DRAWINGS

-
1. Where does our energy come from? (#1)
 2. What organisms can directly use this energy (#2) Draw a brown seaweed example (hint it has 4 letters)
 3. Which prickly marine animal can consume #2 Draw at (#3)
 4. Which bottom dwelling organism can pinch and consume #3 Draw at (#4)
 5. Which swimming creature can eat #4. Draw at #5 (hint it has a 3 letter name)
 6. Draw 10% at the arrows on the Energy Pyramid to show the 10% rule
